

Spot the Hazard.

Can you spot the hazards?

Image 226: NIOSH/John Rekus <http://www.elcosh.org>

- Hazards
- Scaffold missing: cross bracing, full planking, falling object protection
- Scaffold set up on top of unsecured excavation (no caution tape)
- Scaffold footing not properly braced
- Poor housekeeping
- Improper ladder use (less than 3 feet above the point of support, not secured)
- Ladder used is the top of an extension ladder, does not have feet

**Safety Pays.
Falls Cost.**
